

Air Fresh

Water based liquid to eliminate unpleasant smells.

- Liquid on perfumed oils in water
- It is suitable for eliminating unpleasant smells in tanks and domestic areas
- Safe to use on most common metals and coatings

Application

AIR FRESH is used if the smell of the previous cargo (fish oil or turpentine etc.) is perceptible after tank cleaning. It is recommended that the cause of the smell is determined before applying the product. If the smell is caused by bad cleaning the tank should be cleaned again, because application of the product into a dirty tank may cause a surveyor to reject.

Directions for use

AIR FRESH is sprayed in a 1:10 dilution with water. Normally 1-2 litres of product is sufficient for one 400 m³ tank. Allow the product to evaporate for a reasonable period. It is also possible to dose 0.1-1 % of the product to the last rinsing water after tank cleaning. After treatment thoroughly ventilate the tank before entering.

Properties

Green coloured liquid with a specific pleasant smell. It is not corrosive to most common metals and coatings. Non-flammable, miscible with water.

Specific Gravity (20 °C)	: 1.00
Flash point	: none
pH (1% solution)	: 7.0
