

# Ink Remover

**Concentrated UV and offset ink remover to replace hazardous and environmentally unfriendly solvents.**

- Universally applicable
- CFC free
- High flash point, therefore very safe to use
- Highly biodegradable
- Non-toxic
- Does not need to be heated
- No hazard labels

## General information

INK REMOVER is a very powerful cleaning agent, specifically designed for the removal of ink on rotogravure cylinders, rolls, ink sheets, tools etc.

INK REMOVER is free of toxic solvents such as CFCs. It is concentrated, resulting in a short cleaning time. INK REMOVER is residue-free and is completely biodegradable; there is no risk of corrosion; There are no hazard labels. Because it is non-toxic and has a high flashpoint, it is very safe to work with.

## Application

INK REMOVER can be applied to many kinds of ink contamination and the high dissolving power makes it highly suitable for universal use in the graphical industry.

## Directions for use

Ink contaminations are easily removed by some brush strokes or with a cloth. In case of heavier contamination, the objects can be immersed in INK REMOVER; the cleaning time depends on the degree of contamination.

## Properties

Density (20°C)	: 1.09
Colour	: clear
Odour	: characteristic
pH (1% solution)	: not applicable
